

Soil Type	Approx. Fc (%)	Approx. PWP (%)	Interpolation Equation	% Silt	% Clay
Loam	27	12	$VWC (\%) = 47.79 (\text{Soil Suction})^{-0.222}$	40	18
Silt Loam	33	13	$VWC (\%) = 61.017 (\text{Soil Suction})^{-0.250}$	65	15
Clay Loam	32	20	$VWC (\%) = 61.22 (\text{Soil Suction})^{-0.192}$	34	34

Note: Soil suction is in kilopascals (kPa) which is equal to Centibars (cb).
