^aPlant 1–2 weeks later along the lower lake shore and in the central part of state and 2–3 weeks later in northern counties.

^bCultivars vary greatly in time needed to reach harvest stage; extend the harvest season by planting cultivars of different maturity dates or by making successive plantings of the same cultivar.

^cEstimated yields under less than ideal growing conditions; actual yields will vary widely with weather, soil fertility and cultural practices.

^dTwo inches of soil covering at planting. Gradually fill trench 6–8 inches with soil as plants grow.

^eMay 25 for sugary enhancers and supersweets.
