

Hoard Museum, Fort Atkinson -

4 JCMGVA members comprise the Hoard Museum Master Gardener Committee, and have taken a leadership role in designing, developing, and maintaining the current Hoard Museum Gardens.

A new 800 square foot rain garden was prepared and planted with native plants (some grown from seed by elementary students or MGs), a presentation on rain gardens was presented to the public, and the JCMGVA donated funds for installation of a permanent informational sign.

MGs were also involved in creating a brochure and presentation about the year old Roger F. and Sandra L. Anderson Intersectional Peony Garden, to be dedicated next year.

Plans for 2012 include helping organize and host a fund raising Garden Tour for the museum, and installing a new garden around the lawn sign for the Museum.
