

Set Up a Spending Plan

Setting up a spending plan includes:

- Figuring out your average monthly income
- Identifying financial goals
- Keeping track of your average monthly living expenses

Figure out your monthly income. If you use your “take-home” pay amount, then taxes and some other expenses may already be taken out for you. If you work seasonally, divide up what you can spend from that income each month during the year.

INCOME SOURCE	AMOUNT
Paycheck	
Paycheck	
Tips/Bonuses/Commissions	
Interest/Dividends	
Grants/Financial Aid (If you get a lump sum, divide up what you can spend each month during the school year - after you have paid tuition)	
Child Support	
Public Assistance	
Social Security	
Other Income	
Total Monthly Income	

Identify financial goals. The reason to have a spending plan is to make sure that you’re spending your money on things that are the most important to you. For each goal, figure out the total amount needed, the date you want to reach your goal, and how much you need to save monthly. For example, if you want \$400 in your emergency fund in one year, you need to save around \$33 every month.

Financial Goals	Total Amount Needed	Date Needed (in months) (6 months, 24 months, etc.)	Amount to Save Monthly (Divide the total needed by the number of months)

Module A: HOW MUCH WILL IT COST? AND CAN I AFFORD IT?

Keep track of your monthly **debt payments**. The more debt you have, the less money you have left to cover your other monthly living expenses. If you can, try to pay more than the minimum due.

Keep track of your average **monthly spending**. To figure out your monthly spending, look at your bank/ credit union statement and credit card bills. For cash purchases, try writing down how much you spend during the month in a notebook or calendar you carry with you. You can be as specific or general as you want, but here are some categories to get you started.

FIXED EXPENSES (Expenses that stay the same every month)	MONTHLY AMOUNT
Rent or Mortgage	
Vehicle Payment	
Monthly Insurance Payments: Vehicle	
Renter's or Homeowner's	
Life	
Health	
Taxes (estimated tax payments above and beyond monthly withholding from your paycheck)

Total Discretionary Expenses	

Identify infrequent expenses. Some of these expenses you may already be paying monthly. But if you pay any of the following expenses annually or quarterly, be sure to plan for them. For example, if you pay \$300 towards your car insurance four times a year – for a total of \$1200 a year – that means you need to save \$100 a month to have enough money for your quarterly payments. Be sure to include these infrequent expenses in either your monthly savings plan or your monthly expenses.

Now add up all of your monthly savings and expenses:

TOTAL MONTHLY EXPENSES	AMOUNT
Total Savings	
Total Debt Payments	
Total Fixed	
Total Flexible/Variable	
Total Discretionary	
TOTAL EXPENSES =	

Module A: HOW MUCH WILL IT COST? AND CAN I AFFORD IT?

Then subtract your total expenses from your monthly income:

INCOME MINUS EXPENSES	AMOUNT
Total Monthly Income	
Total Monthly Expenses	
Income Minus Expenses =	

Ask yourself:

- Does your income cover all of your living expenses and savings goals?
- Or are you running out of money by the end of the month?

If yes, go back over your *flexible* and *discretionary* expenses and look for small ways to cut back. Start with those expenses that are not as important to you.

If your monthly expenses are greater than your monthly income, there are 3 options:

- Cut back on monthly spending
- Make more money
- Do both

Sometimes more money can come from a raise at work, turning a hobby into second job, getting a tax refund, or having a rummage sale. Tracking your spending will help you find places where you can trim expenses—even if it's just for a short time.
